

Danshu Jiang

Biotechnology Undergraduate | Aspiring Bioinformatician

Changsha, Hunan, CN

danshujiang0@gmail.com

Chinese, English

BACKGROUND

ABOUT

Undergraduate Biotechnology student at Hunan Agricultural University with hands-on research experience in plant tissue culture, virus detection, and virus-free technology design. Passionate about bridging biology and computation—applying Python and AI tools to solve biological problems. Seeking opportunities in bioinformatics to combine wet-lab expertise with computational analysis.

SKILLS

Programming & Bioinformatics

Python

Biopython

Pandas

Data Analysis

Sequence Analysis

AI & Productivity Tools

ChatGPT

Claude Code

Large Language Models

AI-assisted Research

Prompt Engineering

Wet-Lab Techniques

RT-PCR

RNA/DNA Extraction

Gel Electrophoresis

Tissue Culture

Aseptic Technique

Virus Detection

Collaboration & Version Control

GitHub

Git

Scientific Writing

Protocol Documentation

EDUCATION

Biotechnology, Bachelor of Science, Hunan Agricultural University

Sep, 2022 - Jun, 2026

- Molecular Biology
- Genetics
- Plant Tissue Culture
- Virology
- Bioinformatics
- Biochemistry
- Cell Biology
- Microbiology

INTERESTS

Bioinformatics

- Genomic Data Analysis
- Transcriptomics
- Viral Genomics
- Computational Biology

Plant Biotechnology

- Virus-Free Propagation
- Molecular Breeding
- Germplasm Conservation
